Raphael Bouskila

QA Engineer | Manual & Automation Testing

054-774-6253 | RaphaelBouskila148@gmail.com | LinkedIn | Portfolio & Test Reports | GitHub

PROFESSIONAL SUMMARY

QA Engineer with a strong foundation in manual testing, proven on hands-on web and Android projects from test planning and defect reporting to release-readiness assessment. Builds UI test automation in Python and Playwright with GitHub Actions CI, and uses AI agents to speed up test design and reporting while verifying every result. Practical experience with Jira, TestRail, Postman and SQL, plus prior team leadership.

SELECTED PROJECTS

BrewDog USA | Manual & Automated E-commerce Testing Repository · Live report · STR

- Executed 246 manual test cases in TestRail on desktop and mobile across Chrome, Firefox and Edge; reported 72 defects in Jira with steps to reproduce, severity, priority and evidence, and delivered a No-Go release recommendation in the STR.
- Automated 26 UI tests in Python, Playwright and pytest covering age verification, 6 shop categories, product pages, search, cart, footer links and mobile layout, structured with the Page Object Model.
- Built a GitHub Actions CI pipeline that runs the tests on Chrome/Edge, Firefox and Safari browser engines automatically on every code update and once a week, and publishes an HTML report to GitHub Pages.
- Surfaced 3 live-site issues through automation (search results page crashing on invalid product data, no "no results" message, disabled age gate), documented and tracked as known-issue tests.

Spotify | Android QA View test report

- Executed 149 test cases on a Samsung Galaxy A17 with a 93% pass rate; reported 10 defects in Jira (2 Major) and recommended fixes ahead of release.

AI-Assisted QA Workflows | Claude Agents & Skills 2026

- Built multi-step Claude agent workflows that generate test-case drafts, structure bug reports and assemble STR documents; all output reviewed and every defect reproduced manually.
- Developing a reusable Claude skill that standardizes and automates the STR workflow for future test projects.

Likutei Moharan Study App | AI, Vector Search & Agent Workflows Personal project, 2026

- Built a study app with Hebrew full-text and vector (semantic) search, using Claude skills and agent workflows to cross-reference 113 sources.

TECHNICAL SKILLS

Test automation: Python, Playwright, pytest, Selenium, Page Object Model
CI/CD & version control: GitHub Actions, Git, GitHub, GitHub Pages
QA testing: Functional, regression, sanity, end-to-end, UI/UX, cross-browser, mobile (Android, iOS); Jira, TestRail; STP, STD, STR
APIs & data: Postman, SQL (JOINs, subqueries), vector search
AI for QA: Claude Code, OpenAI Codex, custom skills, hooks and commands, multi-step agent workflows, prompt engineering
Web & methodologies: HTML, CSS; Agile, Waterfall

EDUCATION & TRAINING

QA & Automation Training | The Automation College – Gal Matalon 2026 – Present

- STP/STD documentation, web and e-commerce testing, API testing with Postman, SQL, Python, Selenium and Playwright.

Practical Electrical Engineering | Etgar College, Haifa 2024 – June 2027 (expected)
Electrician Course | Electric College, Hadera 2021 – 2023
Chemistry & Biology Studies | Brooklyn College, New York 2007 – 2011

WORK EXPERIENCE

Maintenance Lead & Team Lead | Harish Municipality 2022 – Present

- Track issues from report to resolution, coordinate contractors and stakeholders, and lead a team of employees.

Fire Detection & Suppression Systems Technician | Afcon 2019 – 2022
Sales & Marketing Manager / Team Lead | USA & Israel 2008 – 2018

- Led sales teams and client relationships, managed government contracts and events, and maintained records using CRM, Excel and QuickBooks.
