Raphael Bouskila

QA Engineer | Manual & Automation Testing

054-774-6253 | RaphaelBouskila148@gmail.com | LinkedIn | Portfolio & Test Reports | GitHub

PROFESSIONAL SUMMARY

QA Engineer with a strong foundation in manual testing, proven on hands-on web and Android projects from test planning and defect reporting to release-readiness assessment. Builds UI test automation in Python and Playwright with Allure reporting and GitHub Actions CI, and uses AI agents to speed up test design and reporting while verifying every result. Practical experience with Jira, TestRail, Postman and SQL, plus prior team leadership.

SELECTED PROJECTS

BrewDog USA | Manual & Automated E-commerce Testing — Automation project · Manual test report (STR)

- Executed 246 manual test cases in TestRail on desktop and mobile across Chrome, Firefox and Edge; reported 72 defects in Jira with steps to reproduce, severity, priority and evidence, and delivered a No-Go release recommendation in the STR.
- Automated 37 UI tests in 11 classes and 10 page objects (Python, Playwright, pytest): age gate, shop categories, product, search, cart, footer, sign-in, newsletter, region and mobile, using the Page Object Model and JSON-driven test data.
- Added Allure reporting with steps, attached values and severity grouped by epic/feature/story, and a GitHub Actions pipeline running every test on Chromium, Firefox and WebKit on each push and weekly, publishing the report to GitHub Pages.
- Surfaced live-site defects through automation (age gate disabled, no "no results" message), kept running as documented known-issue (xfail) tests.

Spotify | Android QA — View test report

- Executed 149 test cases on a Samsung Galaxy A17 with a 93% pass rate; reported 10 defects in Jira (2 Major) and recommended fixes ahead of release.

AI-Assisted QA Workflows | Claude Agents & Skills — 2026

- Built multi-step Claude agent workflows that generate test-case drafts, structure bug reports and assemble STR documents; all output reviewed and every defect reproduced manually.
- Developing a reusable Claude skill that standardizes and automates the STR workflow for future test projects.

Likutei Moharan Study App | AI, Vector Search & Agent Workflows — Personal project, 2026

- Built a study app with Hebrew full-text and vector (semantic) search, using Claude skills and agent workflows to cross-reference 113 sources.

TECHNICAL SKILLS

Test automation: Python, Playwright, pytest, Selenium, Page Object Model, data-driven testing

Reporting & CI/CD: Allure, pytest-html, GitHub Actions, Git, GitHub, GitHub Pages

QA testing: Functional, regression, sanity, end-to-end, UI/UX, cross-browser, mobile (Android, iOS); Jira, TestRail; STP, STD, STR

APIs & data: Postman, SQL (JOINs, subqueries), vector search

AI for QA: Claude Code, OpenAI Codex, custom skills, hooks and commands, multi-step agent workflows, prompt engineering

Web & methodologies: HTML, CSS; Agile, Waterfall

EDUCATION & TRAINING

QA & Automation Certificate | The Automation College – Gal Matalon — 2026

- STP/STD documentation, web and e-commerce testing, API testing with Postman, SQL, Python, Selenium and Playwright.

Practical Electrical Engineering | Etgar College, Haifa — 2024 – June 2027 (expected)

Electrician Course | Electric College, Hadera — 2021 – 2023

Chemistry & Biology Studies | Brooklyn College, New York — 2007 – 2011

WORK EXPERIENCE

Maintenance Lead & Team Lead | Harish Municipality — 2022 – Present

- Track issues from report to resolution, coordinate contractors and stakeholders, and lead a team of employees.

Fire Detection & Suppression Systems Technician | Afcon — 2019 – 2022

Sales & Marketing Manager / Team Lead | USA & Israel — 2008 – 2018

- Led sales teams and client relationships, managed government contracts and events, and maintained records using CRM, Excel and QuickBooks.
