Purpose and Overview

Scope and objectives of this QA project

Purpose

This document presents the findings of manual QA testing performed on the Spotify app for Android, on a Samsung Galaxy A17 with a Free account. Testing covered installing and opening the app, logging in, navigation, search, the library and playlists, music playback, internet connectivity, background playback and interruptions, battery, memory and storage, Free-account limits and ads, podcasts, settings and languages.

Testing Methodology

Testing was performed manually on the phone. Test cases were written, executed and tracked in TestRail (149 test cases in 13 sections). Every failed test was logged as an individual bug in Jira with steps to reproduce, expected results, actual results, priority and severity, and a screenshot from the phone as evidence.

Application Overview

Spotify is a music and podcast streaming app. A Free account plays music with adverts and with limits on choosing songs, skipping and seeking; a Premium account removes these limits and adds downloads.

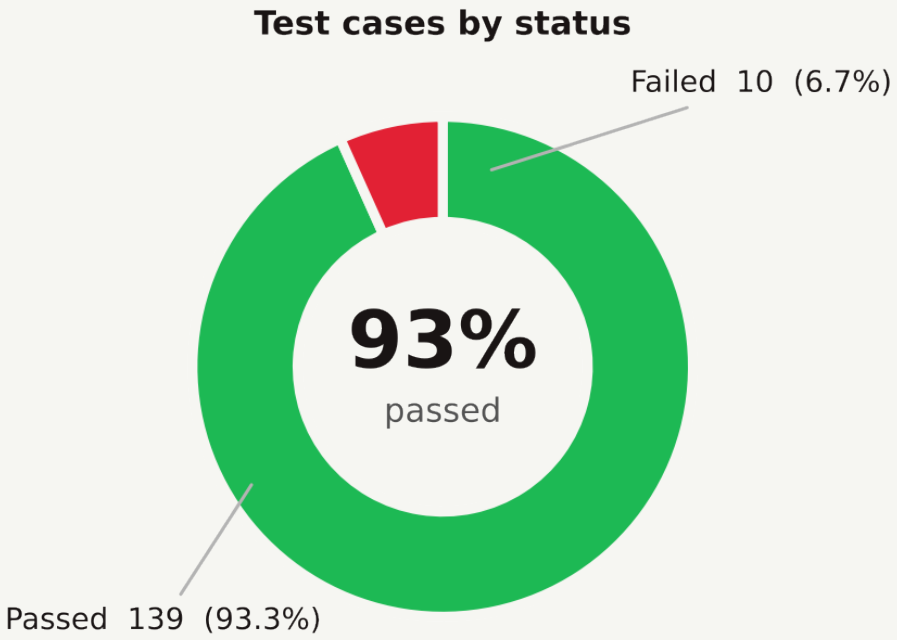

Primary User Flows Tested

Open the app and log in; search for a song, artist, album or podcast and play it; like songs and build, edit and delete a playlist; control playback from the player, the notification and the lock screen; keep music playing in the background and through calls, messages and alarms; lose and regain the internet connection.

Metrics

TestRail Run R1 "1.0 Samsung A17" - 149 test cases | Jira - 10 tracked bugs

Passed	Failed	Blocked	Retest	Total
139	10	0	0	149

Summary of the numbers

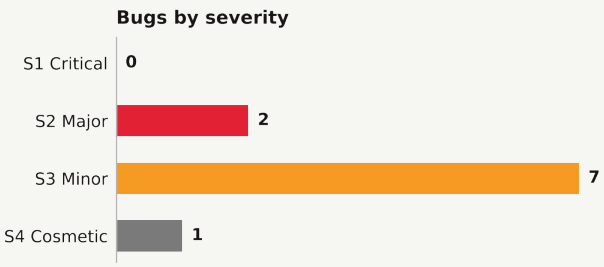

149 test cases were executed in TestRail run R1 on 6 October 2026. 139 passed and 10 failed; none were blocked or left untested. Each of the 10 failed tests was logged in Jira as a bug (SPOTIFY-1 to SPOTIFY-10).

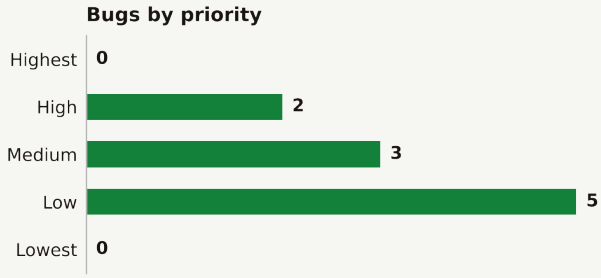

What the results show

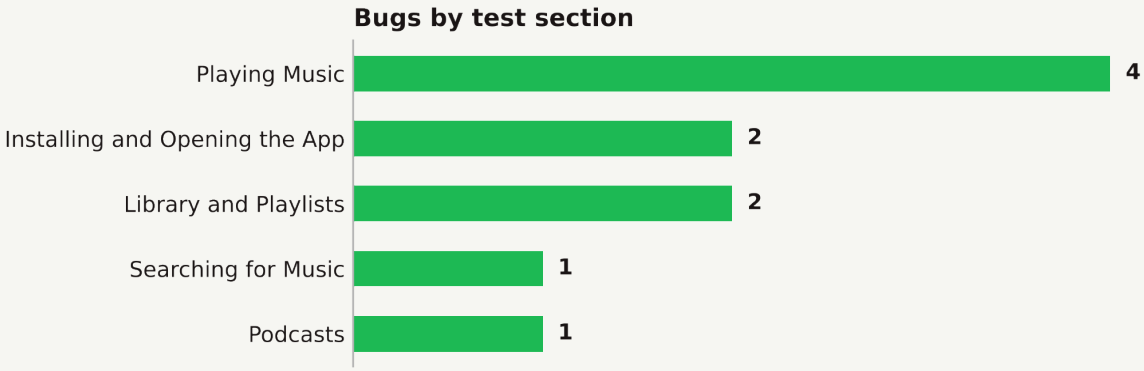

A 93% pass rate on 149 test cases is a very strong result. Every core function of the app worked on the Samsung Galaxy A17: installing and opening, logging in, searching, saving music, playing music and podcasts, background playback, and recovering from a lost internet connection. No test was blocked and no bug stopped me from using the app. The 10 failed tests are concentrated in two areas: the limits placed on Free accounts, which are not explained to the user, and the time the app takes to open after a force stop.

Defect Breakdown

Severity, priority and where the bugs were found

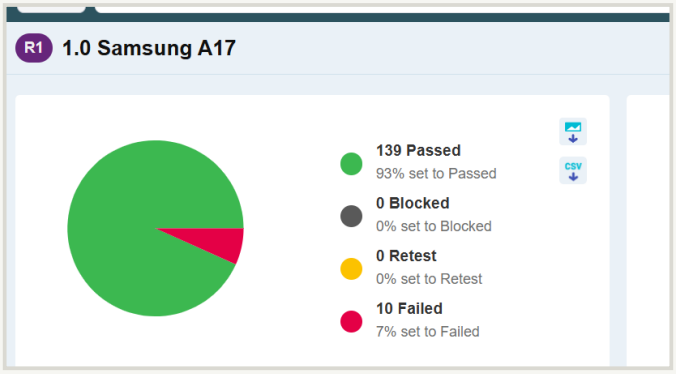

Reading the breakdown

No critical (S1) bugs were found. Two bugs are rated major (S2): the slow, black-screen start after a force stop, and the podcast that stays stuck on an ad until the app is restarted. Seven are minor (S3) and one is cosmetic (S4). Four of the ten bugs are in the music player and two more are in the library and playlists, and most of them come from the same cause: a Free-account limit that the app does not explain. This means a small number of fixes, mainly clear messages for Free users, would close most of the list.

Progress: remaining tests

Recommendations

Priority actions before release

My recommendation is for the Dev Team to fix all 10 bugs listed in this report. None of them stops the app from being used, but together they take away from an otherwise excellent experience. The points below are in order of importance.

Explain the Free account limits (most important): I highly recommend adding a clear user agreement or notice, shown when a Free user signs up and again inside the app, explaining that Free users do not get shuffle control, repeat, or full playback options. Right now the buttons simply do not react, which leaves the user uncomfortable and frustrated because they think the app is broken (SPOTIFY-5, SPOTIFY-7, SPOTIFY-8, SPOTIFY-9).

Moving songs inside a playlist: the user must be able to drag a song to wherever they would like in their own playlist. This is very frustrating and should be fixed immediately, for Free users as well (SPOTIFY-4).

Going back to the last songs: the Previous button should work so the user can return to songs they just heard. This is one of the most frustrating points in the app and should be fixed immediately, for Free users as well (SPOTIFY-6).

App start-up: after a force stop the app shows a black screen for about 15 seconds before it opens. I recommend shortening this or showing a loading screen so the user knows the app is working (SPOTIFY-1, SPOTIFY-2).

Search: when a search makes no sense, the app should say that nothing was found instead of showing artists and playlists that have no connection to it (SPOTIFY-3).

Podcasts: pressing Next or Skip after an ad during a podcast should return the user to the podcast and not leave them stuck until the app is restarted (SPOTIFY-10).

Conclusion / Final Verdict

Overall app quality and release recommendation

The overall assessment for the Spotify Android app is that it is a great app and I would release it to the public. Out of 149 test cases, 139 passed (93%), no critical bugs were found, and everything the app was created to do works well: finding music and podcasts, playing them smoothly, saving them to a library, and keeping the music going in the background, through calls and messages, and through changes in the internet connection.

The 10 bugs I found do not stop anyone from using the app. Most of them are about Free-account limits that are not explained to the user, and they can be fixed in an update after release. My recommendations are to fix all of them, starting with a clear explanation of what Free users do and do not get, moving songs inside a playlist, and going back to the last songs.

I give my final verdict as a green light: the app is ready for the public.

FINAL VERDICT

GO - GREEN LIGHT - APPROVED FOR PUBLIC RELEASE

Test Cases

Installing and Opening the App 0

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

Install and Launch 5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T1	Opening the app for the first time and verify that the app opens properly the very first time after you install it.		Raphael B.	Passed		
T2	Closing and reopening the app and verifying that the app comes back normally after you swipe it away.		Raphael B.	Passed		
T3	Opening after a full stop and making sure that the app starts cleanly after Android has fully stopped it.		Raphael B.	Failed		
T4	How long the app takes to open checking to make sure that every time I open and close it opens swiftly		Raphael B.	Passed		
T5	Checking the screens start up mode every time it opens		Raphael B.	Failed		

Permissions and Screenshots 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T7	The app still works if you refuse permissions it does not really need.		Raphael B.	Passed		

T8	You can take a normal screenshot of Spotify, so you can use screenshots as proof of bugs.		Raphael B.	Passed		

Updates and Phone Details 3

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T9	The app still works and keeps your account after an update.		Raphael B.	Passed		
T10	Allows me to take a record of the exact phone and Android version, so bug reports are complete.		Raphael B.	Passed		
T11	The install recovers if the internet drops for a moment.		Raphael B.	Passed		

Logging in and your Account 0

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

Login details and Checks 5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T12	You can log in with a correct email and password.		Raphael B.	Passed		
T13	Nobody can get in with a wrong password.		Raphael B.	Passed		
T14	checking: The app does not let you log in with nothing typed.		Raphael B.	Passed		
T15	The app notices an email that is not written properly.		Raphael B.	Passed		
T16	The eye button shows and hides what you typed without changing it.		Raphael B.	Passed		

Recovery, Staying loggeed in and logging out 5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

T17	The "forgot password" help can be opened.		Raphael B.	Passed		
T18	You do not have to log in again every time you open the app.		Raphael B.	Passed		
T19	After logging out, nobody can see or use your account on this phone.		Raphael B.	Passed		
T20	The app explains the problem if there is no internet while logging in, and works again afterwards.		Raphael B.	Passed		
T21	If Spotify logs you out by itself for being idle for too long, it tells you clearly and nothing is lost.		Raphael B.	Passed		

Moving Around the App 0

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

Main Menu and buttons 8

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T22	The Home page opens and works.		Raphael B.	Passed		
T23	Each tab or dropdown menu button opens its own page.		Raphael B.	Passed		
T24	Back takes you one step back, not out of the app.		Raphael B.	Passed		
T25	Long pages scroll smoothly and nothing covers the buttons.		Raphael B.	Passed		
T26	One tap does one thing, and you do not hit the wrong button by accident.		Raphael B.	Passed		
T27	When something takes time, the app shows it is working and then finishes.		Raphael B.	Passed		
T28	Tapping Home right after looking at the Premium page really goes to Home.		Raphael B.	Passed		

T29	You can open the share menu for a song and close it again without problems.		Raphael B.	Passed		

UX/UI Layout and Comfort 5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T30	The app explains clearly when it cannot load because there is no internet.		Raphael B.	Passed		
T31	The app is still usable when the phone's text is made bigger.		Raphael B.	Passed		
T32	The app is still usable when everything on screen is made bigger.		Raphael B.	Passed		
T33	The app behaves sensibly when you turn the phone.		Raphael B.	Passed		
T34	Text can be read in both phone colour modes.		Raphael B.	Passed		

Accessibility and Keyboard 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T35	A disabled user can hear what each main button is.		Raphael B.	Passed		
T36	The on-screen keyboard does not get in the way of search results.		Raphael B.	Passed		

Searching for Music 0

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

Search bar 9

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T37	You can find a well-known song by typing its name.		Raphael B.	Passed		
T38	You can find an artist and open their page.		Raphael B.	Passed		

T39	You can find an album and see its songs.		Raphael B.	Passed		
T40	The app suggests results before you finish typing.		Raphael B.	Passed		
T41	Capital letters make no difference to search.		Raphael B.	Passed		
T42	Search still finds a song if you leave out an apostrophe or accent.		Raphael B.	Passed		
T43	Search copes with one wrong letter.		Raphael B.	Passed		
T44	Nothing bad happens if you search with an empty box.		Raphael B.	Passed		
T45	The app tells you clearly when it finds nothing when you search for nonsense		Raphael B.	Failed		

Recent Searches and typing new ones 4

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T46	The small X at the right end of the search box deletes what you typed.		Raphael B.	Passed		
T47	You can remove a single item from your recent searches.		Raphael B.	Passed		
T48	You can wipe your whole list of recent searches.		Raphael B.	Passed		
T49	Back returns you to the same filtered results.		Raphael B.	Passed		

Browsing and categories 4

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T50	The small buttons under the search box (Songs, Albums, Artists...) show only that type.		Raphael B.	Passed		
T51	You can find music by tapping categories instead of typing.		Raphael B.	Passed		

T52	Podcasts can be found and are clearly marked as podcasts.		Raphael B.	Passed		
T53	Children's songs can be found.		Raphael B.	Passed		

Library and Playlists 0

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

Saved songs and Playlists 10

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T54	A song you like is saved to Liked Songs.		Raphael B.	Passed		
T55	You can remove a song from Liked Songs.		Raphael B.	Passed		
T56	An album you save appears in Your Library.		Raphael B.	Passed		
T57	You can create your own playlist.		Raphael B.	Passed		
T58	You can put a song into your playlist.		Raphael B.	Passed		
T59	The app handles the same song being added twice in a sensible way.		Raphael B.	Passed		
T60	You can change a playlist's name.		Raphael B.	Passed		
T61	You can move a song up or down and it stays there.		Raphael B.	Failed		
T62	Removing one song does not touch the others.		Raphael B.	Passed		
T63	Deleting a playlist removes only that playlist.		Raphael B.	Passed		

Following Artists 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T64	You can follow an artist and they appear in Your Library.		Raphael B.	Passed		
T65	You can stop following an artist.		Raphael B.	Passed		

Playlists for Free account 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T68	On a Free account, the short text list of songs on your playlist page shows the songs in their real order.		Raphael B.	Passed		
T69	On a Free account you understand why you cannot pick a single song in your playlist.		Raphael B.	Failed		

Saved after restart 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T66	What you saved is not lost when the app closes.		Raphael B.	Passed		
T67	Liked Songs and your own playlist show their songs after the app restarts.		Raphael B.	Passed		

Playing Music 0

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason

Main player buttons 7

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T70	Music starts when you press Play.		Raphael B.	Passed		
T71	Pause stops the music and Play continues from the same place.		Raphael B.	Passed		
T72	The Next button moves to another song.		Raphael B.	Passed		
T73	The Previous button works, or the app explains why it cannot be used.		Raphael B.	Failed		
T74	You can move to another part of the song by dragging the progress line, or the app explains why you cannot.		Raphael B.	Failed		

T75	Shuffle can be turned on and off.		Raphael B.	Failed		
T76	Repeat can be switched between off, repeat all and repeat one song.		Raphael B.	Failed		

Queue and Player screens 6

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T77	You can line up a song to play next.		Raphael B.	Passed		
T78	You can take a song out of the queue.		Raphael B.	Passed		
T79	Queued songs play one after another in the order shown.		Raphael B.	Passed		
T80	The player screen, the notification and the lock screen all show the same song.		Raphael B.	Passed		
T81	You can pause, play and skip from the notification without opening Spotify.		Raphael B.	Passed		
T82	The X on the Spotify notification stops the music and removes the notification.		Raphael B.	Passed		

Sound output and Long play options 7

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T83	When the app says it is playing, you can actually hear it.		Raphael B.	Passed		
T84	Music does not stop when you leave Spotify.		Raphael B.	Passed		
T85	The phone's volume keys change the music volume.		Raphael B.	Passed		
T86	When you come back to a podcast episode it continues from where you left it.		Raphael B.	Passed		
T87	Music plays for half an hour with no unexpected stops.		Raphael B.	Passed		

T88	Music moves to a Bluetooth device and back to the phone.		Raphael B.	Passed		
T89	The button that shows where music is playing opens and closes properly.		Raphael B.	Passed		

Player Extras 3

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T90	When the player says "Nothing playing", pressing Play does something sensible.		Raphael B.	Passed		
T91	Lyrics appear for a well-known song and follow the music.		Raphael B.	Passed		
T92	The sleep timer stops the music after the time you choose.		Raphael B.	Passed		

Internet Connectivity 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T93	Music plays smoothly on good Wi-Fi.		Raphael B.	Passed		
T94	Music plays on mobile data.		Raphael B.	Passed		

Connections changes 5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T95	The app shows it is loading on a bad connection and recovers when the connection improves.		Raphael B.	Passed		
T96	The app handles the internet disappearing in the middle of a song.		Raphael B.	Passed		
T97	Music can continue after the internet returns, without restarting the app.		Raphael B.	Passed		
T98	Music survives the phone changing from Wi-Fi to mobile data.		Raphael B.	Passed		
T99	Music survives the phone changing from		Raphael B.	Passed		

	mobile data to Wi-Fi.					

Offline Player 4

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T100	The app tells you clearly that you are offline and can still be used.		Raphael B.	Passed		
T101	Search tells you clearly that it cannot work offline.		Raphael B.	Passed		
T102	Pages load again once the internet is back.		Raphael B.	Passed		
T103	A Free account is told clearly that downloading needs Premium.		Raphael B.	Passed		

Downloads and repeated changes 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T104	Downloaded music plays without internet.		Raphael B.	Passed

Bug Reports

Jira - Spotify APP mobileSTR (SPOTIFY)

Bug Reports

The pages below are the full exported Jira record, showing every bug exactly as documented in Jira: status, priority, severity and description (steps to reproduce / expected / actual results). Each bug is followed by its screenshot evidence from the phone.

Bugs by Severity - Quick Reference

S1 Critical	S2 Major	S3 Minor	S4 Cosmetic	Total
0	**2**	**7**	**1**	**10**

Reading the Fields Below

Priority reflects how urgently a bug should be worked on relative to other open items. Severity reflects how badly the defect affects the app itself, independent of scheduling (from cosmetic issues up to a full blocker). A bug can be high priority but low severity, or the reverse - both fields are recorded for every issue below.

Every bug below is presented exactly as recorded in Jira, in the order SPOTIFY-1 to SPOTIFY-10.

Description

Steps to Reproduce:

1. Open the Spotify App and play a bit with it.
2. Close the App by Force stop.
3. Open again

Expected Results:

The App should open cleanly and easily.

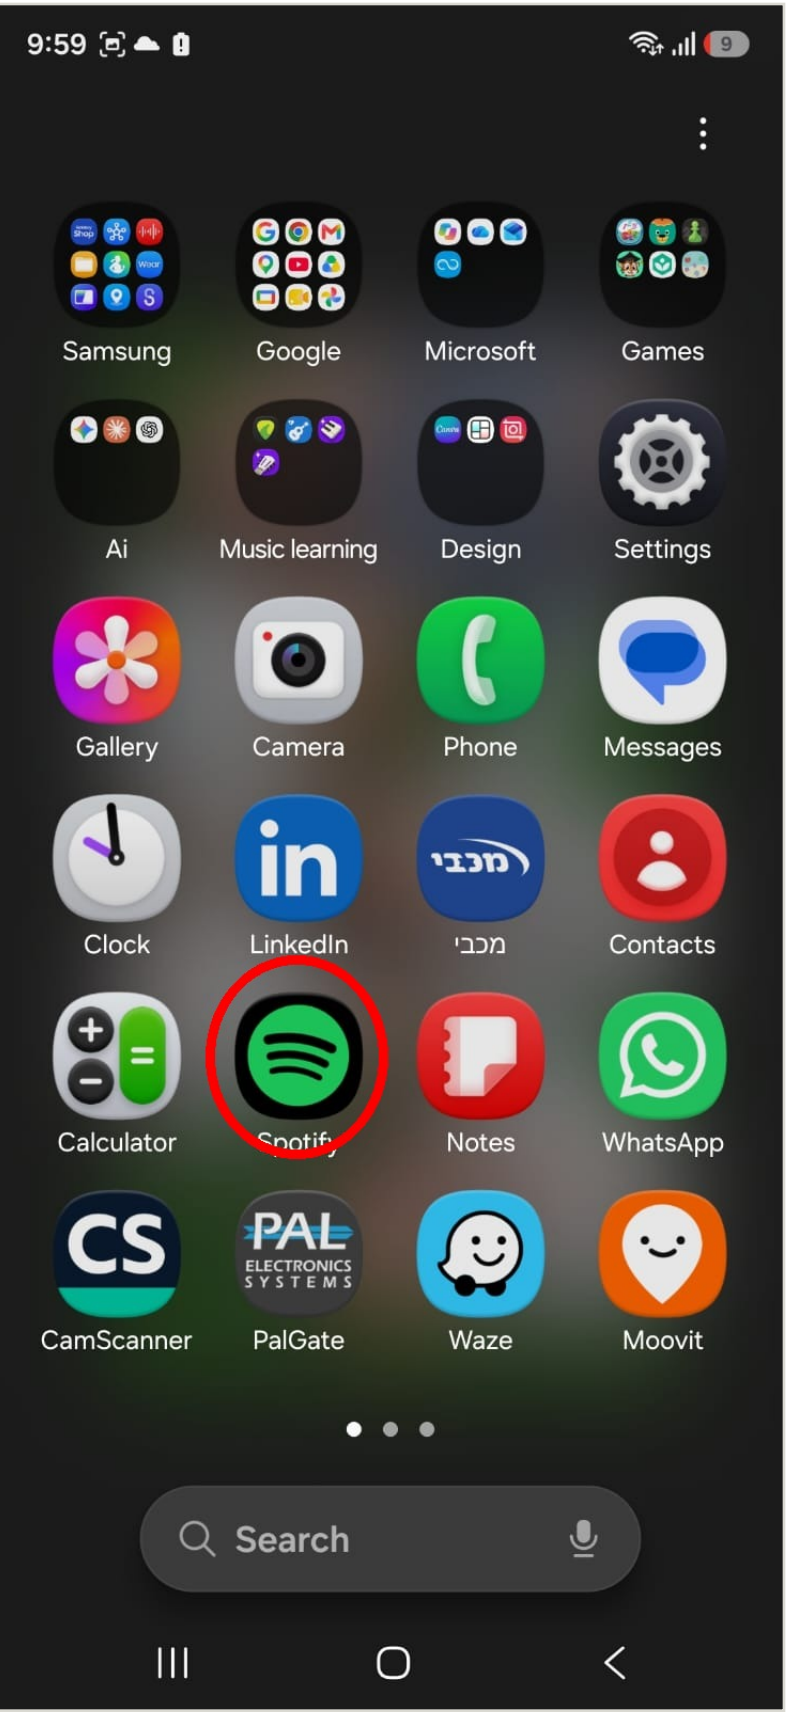

Actual Results:

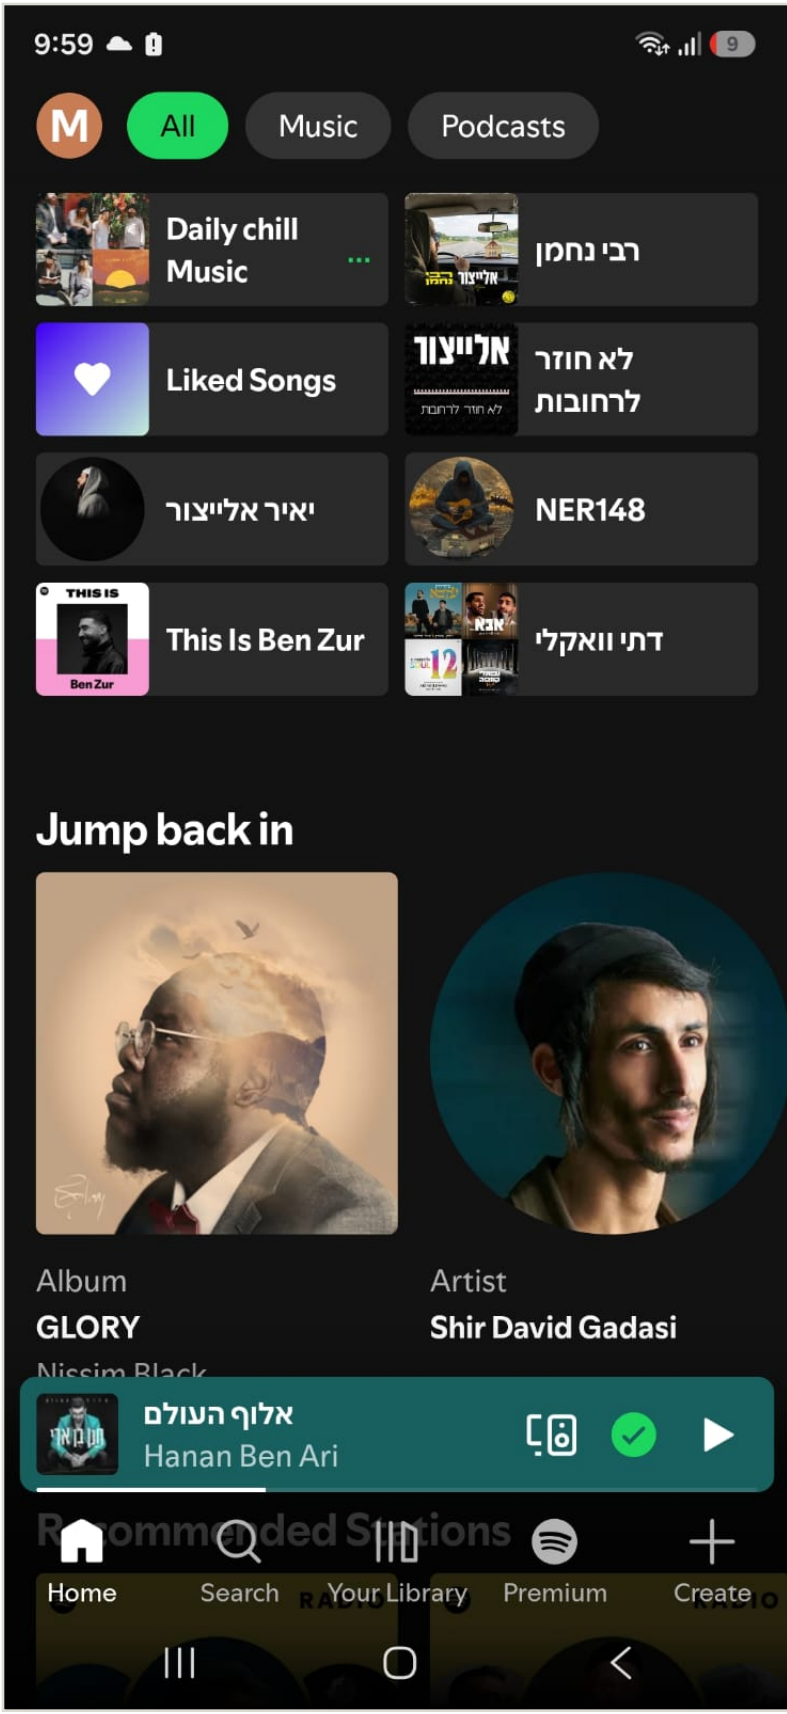

The App opens up and a black screen shows up for a good 15 seconds and the startup is slow.

Related TestRail test: T3 | Evidence: see the next page

SPOTIFY-1 - Screenshot evidence

App does not start cleanly after Force stop
